DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of claims 35-51 in the reply filed on 5/4/2010 is acknowledged. The traversal is on the ground(s) that the claims define a single inventive concept.. This is not found persuasive because in order to define a single inventive concept the claims must share a "special technical feature". A special technical feature can not be a feature that is known in the art, therefore as claim 1 has been shown to be anticipated by Wade, claim 1 does not share a special technical feature.

The requirement is still deemed proper and is therefore made FINAL.

Allowable Subject Matter

Claims 35-51 are allowed.

The following is an examiner's statement of reasons for allowance: the available prior art does not teach or suggest to one of ordinary skill, the washing apparatus as claimed, in particular the use of a flow rate adjuster to adjust the flow through the heat exchanger to a higher volume when not being used to provide spray to that which is being washed. The increased flow is useful to remove scale within the heat exchanger, while the reduced flow rate maintains a safe and comfortable fluid flow rate for the user.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

This application is in condition for allowance except for the following formal matters:

The claims withdrawn with traverse must be cancelled in order to put the case in condition for allowance, or modified to include the same special technical feature.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
